

COSMIC DESIGN

FALL 2025

MODULE 3 Part 2 - Notes & Summary

Sagittarius — The Hero Answering the Call

Module 3, Part 2

This lecture opens with a personal reflection on rediscovering Sagittarius through the lens of True Sky Astrology and Cosmic Design. The speaker shares that before channeling Cosmic Design, they never felt a strong connection to Sagittarius. However, through deep study and intuitive revelation, Sagittarius emerged as one of the most potent constellations for understanding the soul's journey through incarnation.

1. The Awakening of Sagittarius

Through pattern recognition and meditation, the relationship between **Sagittarius and Pluto** became clear. This connection revealed itself during Pluto's transit through Sagittarius and led to a direct metaphysical dialogue with both the constellation and the planet's consciousness. Much of this lecture is channeled from that experience, blending intuitive download with wisdom from Golden Age Leadership Astrology.

2. Departure from Traditional Astrology

Unlike traditional Western astrology—which presents Sagittarius as a symbol of wanderlust or adventure—Cosmic Design redefines it as **the archetype of the truth seeker, the torch bearer, and the hero answering the call**. This represents not just curiosity about the external world but a profound **soulful desire to know who we are, why we are here, and how to live in full resonance with our purpose**.

3. Elemental Resonance: The Fire of the Torch

Sagittarius is a **fire constellation**, representing the light of the torch that guides the soul through darkness. Its fire is the **illumination of curiosity and courage**—the light that allows the seeker to move through the unknown. This torch-bearing symbolism aligns Sagittarius with the hero's journey: the moment the soul says “yes” to incarnation, stepping into the human experience with wonder and bravery.

4. The Seasonal & Cosmic Context

In True Sky alignment, **Sagittarius spans December 19 to January 21**, holding the energy of the **December solstice** in the Northern Hemisphere. This period marks the descent into darkness and the rebirth of light—the perfect mirror of Sagittarius's spiritual codes. As the world turns inward during winter, Sagittarius invites us to **seek illumination within the shadows** and to **carry the torch of curiosity through the stillness**.

5. Soul Codes of Sagittarius

Sagittarius embodies the **soul's curiosity and quest for truth across dimensions**. It is the frequency of:

- **The Hero answering the Call** – leaving behind comfort to explore the unknown.
- **The Torch Bearer** – carrying light into darkness.
- **The Truth Seeker** – asking the timeless questions of existence.

In this framework, the wanderlust of Sagittarius is not escapism but **sacred exploration**—the desire of the soul to experience, evolve, and remember its divine purpose.

6. Practical Interpretation

For those reading charts—whether natal or of the day—Sagittarius placements reveal **philosophical, experiential, and exploratory energies**. People with strong Sagittarius influence often show deep curiosity, love for

travel or study, and an eagerness to expand consciousness through lived experience.

Yet, in Cosmic Design, these expressions are **elevated** beyond mere adventure; they reflect **the soul's desire to seek truth and illumination through experience.**

7. Integration Practice

Students are invited to explore their own charts:

- Identify **which planets fall within Sagittarius.**
- Observe **when the Sun, Moon, or planets move through Sagittarius** each year.
- Use **December 19–January 21** as a period of seeking, illumination, and inner exploration.

This is a season for **carrying the torch of curiosity into the quiet**—to walk willingly into mystery and emerge with greater wisdom.

Closing Reflection

Sagittarius teaches that the path of truth is a journey of courage and curiosity. It calls the soul to leave the familiar behind and walk into the unknown with a torch in hand, trusting that the light we seek will be revealed as we walk.
