

COSMIC DESIGN

FALL 2025

MODULE 2 Part 6 - Transcript (verbatim):

Introduction

Welcome to module 2 part six, where we will learn about the quadrants of the birth chart or the astrological wheel. We will learn what they are, what they mean, and why they are unique to reading a chart through the lens of cosmic design. I channeled through the information about the quadrants, probably about a year ago. When I was reading a chart, and all of a sudden, it appeared to me that not only can we divide this guy up into the exact constellation, not only can we pull through the ancestral code related to that as it relates to the elements, which we will talk about in a future lecture, not only do the placements of the planets and the sun and the moon within the constellation give us insight into the light codes, but the quadrants and the division of the sky into these quadrants actually gives us access to information about the soul's journey and how it relates to the great arc of its incarnations and how this incarnation holds specific information, based upon the quadrants of the placements of the birth chart.

The Four Quadrants

Quadrants are the birth quadrant, the Embodiment quadrant the evolutionary Quadrant and the Soul Quadrant and or the Wisdom Quadrant. So when we look at the astrological wheel, we can take the constellations of Aries, Taurus, and Gemini and assign to them the energy of birth. We can then take the constellations of cancer, Leo, and Virgo, and assign to them the energy of embodiment. We can then take the constellations of Libra, Scorpio, Ophiuchus, Sagittarius, and apply to them the energy of evolution. And then the final three, Capricorn, Aquarius, and Pisces, we can give the energy of soul and or wisdom.

The Purpose and Meaning of the Quadrants

Now, why do these matters matter? Because if you believe in the journey of the soul, you likely believe that we incarnate into multiple incarnations. I tend to believe that this is true. If this doesn't align with your belief system, then you can just go ahead and pause the video and allow this part of the cosmic design methodology to be something that you revisit later. But if you are okay and feel comfortable thinking about the journey of the soul and multiple incarnations, then this might illuminate for you how we can pull more of that deep soul code out of a birth chart by looking at where the placements are in relationship to the quadrants.

Variations in Chart Layouts

Some of birth charts will have a cluster, stellium or conjunction of planets in various different constellations. Some birth charts will have everything all spread out, some birth charts will have almost all of the placements or aspects of the chart in one area of the sky. Now, this is all, of course, dependent upon the day you were born, the time you were born and the place that you were born, because your chart will generate itself based on that information. Your soul chose to come in to this earth, onto this dimension, into this reality at that exact moment for a reason, because when it chose that it knew it would receive a certain amount of light codes that would activate the soul codes that it came in with. And a part of the soul codes are identified based on the quadrants.

The Birth Quadrant

So if we have dominant placements in our birth quadrant, it might mean that we are on a new incarnation cycle. So if you have a lot of placements between the constellations of Aries, Taurus, and Gemini, then you're likely here on a new incarnation cycle, a new mission, you're moving through with kind of this fresh energy of, I haven't been here for a while, and I'm really excited to be here.

The Embodiment Quadrant

If you have more placements in the embodiment quadrant, then this might be a lifetime where you're really moving energy or you're transmuting things or you're feeling things as a physical form, as in your physical body, this might mean that you have a lot of physical ailments, or maybe you have a lot of physical prowess, a lot of your energy moves through your actual embodiment, the experience of the body.

The Evolutionary Quadrant

If you have a lot of placements in the evolutionary quadrant, it might mean that your soul chose this particular lifetime to move through a lot of stuff. So this could be emotional. This could be relational. This could be spiritual. This could be the time where you're really transmuting and alchemizing a lot of lessons through quick evolutions of thought, quick evolutions of mind, quick evolutions of body, quick evolutionary action, likely happens when you have primary placements in the evolutionary quadrant.

The Soul or Wisdom Quadrant

When you have primary placements in the Soul quadrant or the wisdom quadrant, it likely means that you're at the end of an incarnation cycle. So you're here with a lot of previously acquired, information, previously acquired wisdom, from a cycle of incarnations that you chose to do all together so that you could come in and you could have the experience of birth, embodiment

evolution, and then move into that integration space of soul and wisdom. And it means that, yes, you are an old soul. I don't love that term because that really highlights a linear path. But what I really like to tune into is that if you have placements in the soul or wisdom quadrant, it means that you're coming in with a good amount of information. You're coming in with a good amount of perspective. You have that capacity to really sit and integrate. You might not be moving quite so quickly through initiations. You might not be feeling things quite as much through your body and things might not feel quite as fresh or new. It's kind of like you've been here for a while. And so it is that more aged, wise, soulful energy.

Mixed or Balanced Quadrants

A lot of people will say, well, what if I have all of the quadrants represented? And that does happen. It means that your soul has chosen to come in with a full spectrum of this experience, but then you can hone into the particular signatures of the planets, the center of the moon, the mid heaven North Node rising, and see where those situate themselves in relationship to the quadrants and fall through deeper code. So if you have a really well spread out placements, then you are likely in the middle of an incarnation cycle where you're not super fresh and new with a lot of placements in the birth quadrant, where you're not super fixated on embodiment or evolution, but you're kind of in the middle of that cycle and you're still gathering code from each of the constellations for particular reasons.

The Higher-Level View

So when we read the quadrants, we are really tuning in to the higher level, soul journey, incarnation, information about why we are here in this incarnation and how this incarnation relates to other incarnations. So the quadrants really bring forth the code of the ark of incarnations as it relates to the journey of the soul. This can feel super high level woo woo metaphysical for people. So if it doesn't resonate, that's fine. Just let it be there and return to it at a later date.

Reflection and Practice

But if this is stirring something within you, again, go back into that practice of intuition, feel into it. See if you can start to channel connection to not just this incarnation, but all of your incarnations, and how those incarnations relate to each other, because it is never just about one thing. Our bodies don't work in isolation. We work in a web of energy. Our cells don't work in isolation. They work in the ecosystem of the body, and we can take that to the level of the cosmos and the level of the soul. The soul doesn't work in isolation, it works in relationship too, a system of souls, which means that when a soul chooses an incarnation, the incarnation is not isolated either. It is in relationship to the great Ark of Incarnation and the soul's journey. So the quadrants help us access more information about the soul's journey.

Closing

So feel into that. See if you can identify where you have clusters, where you have groupings, and which quadrant they might be representing. If you are one of those souls that has a good spread out, then think about how you might be in the middle of an incarnation cycle and what that might mean about where you've been and where you're going and what you are collecting now. Always, thank you so much for being here. Thank you
