

COSMIC DESIGN

FALL 2025

MODULE 3 Intro & Review: AI Notes & Summary

The Astrological Wheel & the Journey of the Soul

Module Three marks a pivotal expansion in the Cosmic Design training, weaving together celestial mechanics, planetary consciousness, and intuitive interpretation. The focus of this module is on understanding the **astrological wheel**, the **wheel of the year**, and how both mirror the **journey of the soul**.

Students will explore the constellations **Sagittarius** and **Gemini** as archetypal anchors of this journey—Sagittarius representing truth and initiation, and Gemini embodying curiosity and the first breath of human incarnation. Alongside these constellations, the module delves into the **planetary consciousness** of **Pluto** and **Mercury**, examining the energetic “codes” they carry and how they shape evolution and communication.

A new emphasis is placed on reading not only **birth charts** but also **charts of the day**, expanding awareness of how cosmic patterns influence present-moment experience. The lectures also introduce the **First Chord of Consciousness: Trust & Truth**, and unpack the **elemental and ancestral signatures** of each constellation along the astrological wheel.

Before diving in, students are encouraged to review previous modules, which covered:

- The distinction between **True Sky Astrology** (based on the real astronomical positions of the 13 constellations) and traditional Western astrology (based on twelve equal segments).
- The **Three Keys** of the birth chart: **Midheaven**, **North Node**, and **Rising Sign**.
- The **Four Quadrants of the Soul**, mapping the evolution of consciousness through the wheel.
- The foundational practice of **stargazing**, cultivating **intuitive knowing** before intellectual analysis.

Module Three invites participants to approach this deeper material **slowly and reverently**—to integrate the new level of information with **space, grace, and presence**, allowing intuition to lead the way into the next stage of Cosmic Design mastery.
